

<b>Theme:</b>	<i>6-Sigma Overview</i>
<b>Type:</b>	Seminar.
<b>Target Audience:</b>	Employees of companies who are interested in the application or deployment of 6-Sigma in their company.
<b>Background:</b>	6-Sigma is a comprehensive quality optimization program, which is used world-wide by well-known industrial companies. More and more enterprises - large as well as medium-size companies – recognize 6-Sigma not only as methodology for process improvement, but also as strategy for the increase of performance and competitive ability. In the last years 6-Sigma became the standard for many organizations.
<b>Objectives:</b>	Participants will be introduced in the 6-Sigma principles. Practical experience as well as “Best Practices” in the deployment of 6Sigma will be shared. Prerequisites and opportunities for the application of 6-Sigma will be presented and discussed.
<b>Content:</b>	The seminar includes: <ul style="list-style-type: none"><li>⦿ What is 6-Sigma ?</li><li>⦿ Background of 6-Sigma</li><li>⦿ 6-Sigma - change in corporate culture</li><li>⦿ Potential implementations of 6-Sigma</li><li>⦿ Example from the automotive industry: Consumer Driven 6-Sigma at Ford</li><li>⦿ DMAIC project in practice.</li></ul>
<b>Methods:</b>	Presentations, examples, exercises and discussions.
<b>Prerequisites:</b>	None.
<b>Duration:</b>	1 day.
<b>Additional Services:</b>	Apart from the one-day seminar we offer Green Belt, Black Belt and Project Champion training. In addition we support top management in implementing the 6-Sigma methodology into the strategic alignment of the enterprise. With our new Lean Sigma Black Belt training we offer the possibility of connecting Lean Management with the 6-Sigma methodology and converting it integrated in your enterprise.
